

TD-4K

Serological centrifuge/blood group card centrifuge

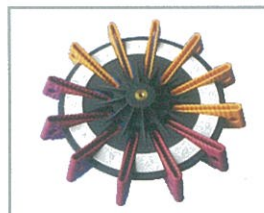

Serological centrifuge is also called Blood type card centrifuge. We deeply research it for several years, and launch the market perfectly after test through many clinical medical institutions. It is special use for blood routine testing, Microcolumn gel immunodetection.

Features:

- The machine adopts brushless motor driving, micro-computer control.
- Electric lid lock, super speed control and self-test protection.
- Low noise, without carbon dust pollution.
- Professional program design, Can be run directly Without tedious parameter settings.
- Can be alternative for 12 and 24 cards micro gel rotor.
- RCF can be directly set up and display, without RPM / RCF translated.

Technical Parameters

Max Speed	3 840 r/min
Max RCF	1 790 Xg
Max Capacity	12 and 24 cards micro gel rotor
Motor	brushless motor driving
Noise	≤60dB(A)
Power	AC 220V 50HZ 10A
Dimension	430 × 340 × 330(L × W × H)mm
Weight	23 kg

Program specification

Timer range	Speed	RCF
0-2 min	900 rpm	100 Xg
2-5 min	1 500 rpm	280 Xg
