TG-20/TG-19/TG-17
Benchtop high speed centrifuge

Features

- The machine adopts frequency conversion motor driving,micro-computer contro - LCD display.

Electronic lid lock, imbalance protection
Faults are diagnosed automatically.

- Rotor head identify automaticlly to prevent speeding.
- The machine is used in the type of flexible collet chuck, which is convenient for replacing the rotor.
It can store 12 operation procedures and there are 19 levels of acceleration and decelerationf for your choice.
RCF can be directly set up and display, without RPM/RCF translated.
Parameters of instruments can be modified during operation.

## TG-1850 None122

## Benchtop high speed centrifuge

Features:

- Frequency conversion motor drive, Microcomputer control.
- LCD display.

Automatic rotor recognition to prevent from overspeed.
Electronic lock, Imbalance protection

- 19 levels of acceleration and deceleration, 12 programs.
- Automatic fault diagnosis.

Programs of RCF can be set up directly.
-Time,Speed, RCF can be modified during operation.
Be easy to replace the rotor with a special elastic fixed method.
Both apply to swing-out rotors and Fixed-angle Rotors
